Component Substitution

Read the CAMS Manual of Motor Sport, Equipment Standards & Guidelines - [3.6.4 Component Substitution Criteria](#)

GIVE A BRIEF OUTLINE OR GENERAL VIEW OF THE SUBSTITUTION

1. Is the original component NLA (no longer available) or available only at an exorbitant cost?

Supply evidence of component NLA or exorbitant cost.

2. Will the substitute component give a demonstrable performance gain?

Supply old part number and new part number indicate how the part will/will not give a performance gain.

3. Is the substitute component similar in appearance and design to the original?

4. Photo of original component.

5. Photo or drawing of substitute component.

6a. Mechanical: Is the substitute manufactured from similar materials to the original component?

6b. Electrical modules: Does the new unit accept original sensor and data inputs?

6c. Does the new unit accept additional inputs & can it control different/more outputs?
